INDEX OF PAPERS

Some Thoughts on Echocardiology, by K. Bom . . . . . pp. 1

Ultrasound. Whistling in the Light, by C. Alvisi . . . . . » 2

An Introduction to Medical Thermography, by D. De Rossi . . . . . » 5

The Relationship of Plasma and Urinary Aldosterone with Sodium Balance, Plasma Renin Activity and Age in Normal Subjects, by A. Salvetti, R. Pedrinelli, L. Poli, D. Giannessi, A. Dalle Luche and P. Duranti . . . . . » 7

Radioimmunoassay of Human Luteinizing Hormone: Bias due to Antisera, by F. Mannelli, M. Bassi, M. Mannelli and M. Serio . . . . . » 18

Rapid Control of Thyrotoxicosis with Combined ^{131}I, Antithyroid and KI Therapy, by S. Refetoff, N. Demeester-Mirkine, A. M. Ermans and L. J. De Groot . . . » 23

Thyroid Performance in an Iodine-Rich Environment (Salsomaggiore Spa), by A. Costa, P. Lorenzini, O. Brambati-Testori, F. Cottino and G. De Sanso . . . » 30

Distribution of ^{51}Cr-Labeled Lymph Node Cells in *Pseudomonas aeruginosa*-infected Mice, by M. Campa, E. Ferrannini, V. Colizzi and C. Garzelli . . . . . » 37

Free Triiodothyronine (T_3) Index Obtained from Measurements of T_3 Resin Uptake and Total T_3 Serum Concentration, by G. C. Zucchelli, D. Giannessi, A. Clerico, G. Mariani, C. Levanti, A. Carpi, A. Galbiati and R. Bianchi . . . » 43

A Simple Method for Continuous Recording of Fetal Systolic Time Interval, by L. Landini, E. Righi and A. Zacutti . . . . . » 48

Communications of the XVI National Congress of the Italian Society for Nuclear Biology and Medicine . . . . . » 53

^{51}Cr Red Cell Survival Studies in Normal Subjects and in Patients affected by Hemolytic Disorders. An approach to the Calculation of Hepatic Bilirubin Clearance by Radiochromium, by G. Fresco, B. Fontana and A. Biggi . . . . » 93

Myocardial and Blood Kinetics of Thallium-201 and Potassium-42 in Man at Rest. Preliminary Report, by A. L'Abbate, A. Biagini, C. Michelassi, A. Distante and A. Maseri . . . . . » 98

Transcutaneous Doppler Ulrasonic in the Detection of Cerebral Blood Flow Changes. A Comparison wih Angiographic Data, by G. Buonomini, C. Giraldi and D. Levorato . . . . . » 103

Hepatic Kinetics of ^{99m}Technetium Sulfur Colloid in Cirrhosis, by E A. George, J. B. Shields, E. C. Cabal, R. C. Schulz and R. M. Donati . . . . . » 107

A Reappraisal of Albumin Catabolism and Distribution from Radioiodinated Tracer Sudies in Patients with Renal Failure, by G. MARIANI, F. BONAGUIDI and R. BIANCHI . . . . . pp. 113

First Conference on the Biomedical Press in Ialy. Rome, 16 February, 1977 . . . . » 119

Can Italian Biomedical Journals Survive?, by E. GARFIELD . . . . . » 121

Bio-Medical Publishing in a Multilingual Society and European Integration of Journals, by J. M. GIBB . . . . . » 123

Concerning the Quality Control of a Biomedical Journal, by L. DONATO and G. MARIANI . . . . . » 125

Problem of Ethics in Research from the Biomedical Press Point of View, by S. G. OWEN . . . . . » 128

Concerning the Costs of Publishing a Biomedical Journal in English in Italy. by G. MARIANI . . . . . .

^{57}Co-Bleomycin for Brain Scan Diagnosis of Intracranial Lesions, by G. SALAR, A. CARTERI and P. ZAMPIERI . . . . . » 137

Isotopic Cisternography in Congenital and Acquired Skull Anomalies, by M. BALDINI and L. PRINCI . . . . . » 141

An Off-Line « Interpreter » for Manipulation of Scintigrafic Images, by A. TORSOLI, R. VERATTI and R. GUZZARDI . . . . . » 146

Monoiodoinsulin Specifically Substituted on A_{19} Tyrosine. Preparation, Characterization and Determination of the Specific Radioactivity, by L. CITTI, L. BATTINI, P. CECCHETTI and R. NAVALESI . . . . . » 152

^{131}I-19-Iodocholesterol Scintigraphy for the Localization of Medullary Tumors, by L. TRONCONE, P. G. FALAPPA, C. FOCACCI and G. GALLI . . . . . » 159

A Method for Computing Frequency Functions from Input-Output Vascular Dilution Curves, by A. POLLASTRI, M. PISTOLESI and C. GIUNTINI . . . . . » 165

Perfusion Lung Scan in the Preoperative Assesment of Pulmonary Function in Bronchial Carcinoma, by G. PISTELLI, C. A. ANGELETTI, A. JANNI, A. MUSSI, P. PAOLETTI, A. PERISSINOTTO and C. GIUNTINI . . . . . » 173

SUBJECT INDEX

A

A_{19} tyrosine
— preparation, characterization and specific activity of monoiodoinsulin specifically substituted on —, 152.

Acromegaly
— growth hormone kinetics for the evaluation of medical treatment of —, 74.

Adrenal medullary tumors
— adrenal scanning with ^{131}I-19-iodocholesterol, 83, 159.

Albumin
— Catabolism and distribution from radioiodinated tracer studies in renal failure, 113.

Aldosterone
— relationship of plasma and urinary — with sodium balance, plasma renin activity and age in normal subjects, 7.

Anaemia
— iron kinetics in congenital dyserythropoietic — type II, 61.

Angina Pectoris
— ^{201}Tl myocardial scintigraphy in —, 81.

Angiography
— perfusion scintigraphy and pulmonary — in the diagnosis of pulmonary embolism, 75.
— transcutaneous Doppler ultrasonic in the detection of cerebral blood flow changes. Comparison with —, 103.

Antithyroid autoantibodies
— interference of circulating thyroglobulin in the determination of — by competitive binding radioassay, 85.

Automatic analysis
— of scintigraphic images, 86.

B

Bilirubin
— hepatic — clearance and ^{51}Cr red cell survival in normal and patients with hemolytic disorders, 93.

Biomedical journals
— can Italian — survive?, 121.
— costs of — in English in Italy, 130.
— quality control of —, 125.

Biomedical press
— and ethics in research, 121.
— and european integration of journals, 123.
— in Italy, 119.

Biopsy
— thin needle — of thyroid nodules in the early diagnosis of thyroid cancer, 66.

Brain
— computerized-scintigraphy in cerebrovascular diseases, 68.

Breast cancer
— carcinoembryonic antigen in the follow-up of patients with —, 82.

Bronchial carcinoma
— perfusion lung scan in the preoperative assessment of pulmonary function in —, 78, 173.

C

Calcitonin
— treatment of Paget's disease: radioisotopic follow-up, 70.

Carbohydrate metabolism
— maternal, and fetal growth, 65.

Carcinoembryonic antigen (CEA)
— assay by RIA in patients with gynecologic malignancies, 74.
— in the follow-up of patients with breast cancer, 82.

— RIA of — : observations and methodological variations, 82.
— RIA of the —, 73.

Cerebral blood flow
— detection of — changes by Doppler ultrasonics, comparison with angiographic data, 103.

Cerebral scintigraphy
— sequential — in intra and extracranial vascular diseases, 58.

Cerebrovascular diseases
— and computerized brain angio-scintigraphy, 68.

Cirrhosis
— and hepatic kinetics of ^{99m}Tc - sulfur colloid, 107.

Cisternography
— by RIHSA in the diagnosis of intracranial pathology in infancy, 64.
— isotopic — in skull anomalies, 57, 141.

^{57}Co
— bleomycin for brain scan, 137.

Compartmental analysis
— quantitative — of control homeostatic mechanisms of glycemia, insulinemia and glucagonemia, 84.

Competitive binding radioassay
— for determination of antithyroblogulin autoantibodies, interference of circulating thyroglobulin, 85.
— for measurement of microsomal thyroid autoantibodies and parallel measurement by passive hemaglutination, 75.

Compton scattering
— tomography by 90° — 72.
— pulmonary regional densitography by detection of 90° — radiations, 79.

Computer processing
— of ^{131}I-Hippuran renograms, 83.

Computerized brain angioscintigraphy
— in cerebrovascular diseases, 68.

Cortisol
— RIA of free urinary —, 61.

Cranial vascular diseases
— and sequential cerebral scintigraphy, 58.

^{51}Cr
— distribution of — labelled lymph node cells in *Pseudomonas Aeruginosa* infected mice, 37.
— red cell survival studies in normals and in patients affected by hemolytic disorders: calculation of hepatic bilirubin clearance by —, 93.

^{131}Cs
— accumulation and histologic structure in thyroid tissues, 66.
— scan for « cold » thyroid nodules, 72.

D

Data processing
— automatic — in the in vitro section of a Nuclear Medicine Service, 63.

Deconvolution analysis
— of ^{125}I-insulin decay function and post-glucose endogenous insulin curve, 78.

Densitography
— pulmonary regional — by detection of 90° scattered radiation from an external source of gamma rays, 79.

Dilution curves
— a method for computing frequency functions from input-output vascular —, 165.

E

Echocardiology
— some thoughts on —, 1.

Echography (see also Ultrasounds)
— comparison of scintigraphy, — and thermography in the diagnosis of thyroid nodular diseases, 65.

Estriol
— RIA of plasma and urinary — in pregnancy: comparison of tritiated and radioiodinated tracers, 70.

Ethics
— in research form the biomedical press point of view, 128.

F

Fetal growth
— and maternal carbohydrate metabolism, 65.

Fetal systolic time interval
— a simple method for continuous recording of —, 48.

Free T_3 Index
— Obtained from measurements of T_3 resin uptake and total serum concentration, 43.

Frequency functions
— A method for computing — from input-output vascular dilution curves, 165.

G

Glucagonemia
— quantitative compartmental analysis of control homeostatic mechanisms of glycemia, insulinemia and —, 84.

Glycemia
— see glucagonemia.

Goitre
— endemic — in the Madonie, pathogenetic hypothesis, 72.

Growth Hormone
— kinetics in medical treatment of acromegaly, 74.

Gynecologic malignancies
— and carcinoembryonic antigen, 74.

H

Hemolytic disorders
— ^{51}Cr red cell survival and calculation of hepatic bilirubin clearance in —, 93.

Hepatic kinetics
— of ^{99m}Tc-sulfur colloid in cirrhosis, 107.

Hepatobiliary system
— investigation on — with ^{99m}Tc-HIDA, 82.
— scanning with ^{99m}Tc-HIDA, 62.
— sequentia l scintigraphy with ^{99m}Tc-orthophenol-acetal-glutamic acid, 62.

^{197}Hg
— bichloride in the scintigraphy of « cold » thyroid nodules, 84.

Hodgkin's disease
— diagnostic accuracy of liver scanning in patients with — undergoing diagnostic laparatomy, 80.

Hypertension
— the role of sequential renal scintigraphy in the study of —, 76.

Hyperthyroidism
— incidence of hypothyroidism following ^{131}I therapy for —, 64.
— therapy of —, 69.
— turnover of T_3 in —, hypothyroidism and euthyroidism, 60.

Hypothyroidism
— T_4, and T_3 and TSH RIA as screening for congenital —, 69.
— turnover of T_3 in hyperthyroidism, — and euthyroidism, 60.

I

^{125}I
— Insulin: deconvolution analysis of decay function and postglucose endogenous insulin curve, 78.
— RIHSA: myocardial kinetics: comparison with ^{201}Tl, THO and ^{42}K, 59.

^{131}I
— 19-iodocholesterol: in adrenal scintigraphy of medullary tumors, 83, 159.
— hippuran: computer processing of renograms, 83.
— therapy: incidence of hypothyroidism after — of hyperthyroidism, 64.
— treatment: combined with antithyroid and KI for rapid control of thyrotoxicosis, 23.
— treatment: of hyperfunctioning thyroid nodules, 58.
— treatment: of thyroid carcinoma, 57.

IgE
— RIA of total serum, 73.

Immunoglobulins
— radioreceptor assay of TSH, its use to detect thyroid stimulating —, 68.

^{111}In
— Bleomycin as a tumor localizing agent, 79.

Insulin
— Deconvolution analysis of ^{125}I — decay function and postglucose endogenous — curve, 78.

Internal carotid
— analysis of concentration/time histogram related to the internal carotids in the —, 60.

Intracranial pathology
— diagnosis with radioisotope cisternography by RIHSA in infancy, 64.

Iodine
— thyroid performance in a — rich environment, 30.

Iron
— kinetics in congenital dyserythropoietic anemia type II, 61.

Isotopic angiography
— weighed analysis of concentration/time histogram related to the internal carotids in the —, 60.

K

^{42}K
— myocardial and blood kinetics of ^{201}Tl and —, 98.
— myocardial kinetics: comparison with ^{201}Tl, THO, and —, 59.

Kidney
— and urinary tract malformations: investigation by sequential scintigraphy, 76.

Kinetics
— hepatic — of ^{99}Tc-sulfur colloid in cirrhosis, 107.
— myocardial and blood — of ^{201}Tl and ^{42}K, 98.
— myocardial — of ^{201}Tl: comparison with RIHSA, THO and ^{42}K, 59.
— of albumin in renal failure, 113.
— of growth hormone for evaluation of medical treatment of acromegaly, 74.
— of insulin: deconvolution analysis of decay function and post-glucose endogenous curve, 78.
— of iron in congenital dyserythropoietic anemia type II, 61.

^{81}Kr
— in ventilation pulmonary scintigraphy: comparison of continuous ventilation of — and nebulization of minimicrospheres, 67.

L

Liver
— scanning in patients with Hodgkin's disease, 80.

Lung (see also pulmonary)
— regional — function in chronic obstructive disease, 80.

Luteinizing Hormone
— RIA of —, bias due to antisera, 18.

Lymph Node Cells
— labelled by ^{51}Cr in *Pseudomonas Aeruginosa* infected mice, 37.

M

Microsomal thyroid antibodies
— parallel measurements of — by passive hemoagglutination and competitive binding radioassay, 75.

Minicomputers
— a distributed system of — in a Nuclear Medicine Centre, 71.

Monoiodoinsulin
— Preparation, characterization and specific activity of — specially substituted on A_{19} tyrosine, 152.

Myocardial infarction
— Scintigraphy with ^{99m}Tc pyrophosphate and diphosphate in the diagnosis of —, 62.
— Scintigraphy with ^{99m}Tc pyrophosphate in the diagnosis of —, 85.

Myocardial kinetics
— and blood kinetics of ^{201}Tl and ^{42}K in man, 38.
— of ^{201}Tl: comparison with ^{125}I RIHSA, THO and ^{42}K, 59.

O

Obstructive lung disease
— Regional lung function in chronic —, 80.

P

Paget's disease
— Calcitonin treatment of —: radioisotopic follow-up, 70.

Pituitary function
— Recovery of — and thyroid function following surgical excision of autonomous thyroid nodules in euthyroid subjects, 63.

Pleural effusion
— accumulation of ^{99m}Tc-pyrophosphate in —, 57.

Plasma Renin Activity
— Relationship of plasma and urinary aldosterone with sodium balance, — and age in normal subjects, 7.

Pulmonary
— embolism: perfusion scintigraphy versus pulmonary arteriography, 75.
— function: assessment in bronchial carcinoma by perfusion lung scan, 78, 400.
— Regional densitography: by detection of 90° scattered radiations from an external source of gamma rays, 79.
— Ventilation — scintigraphy: comparison between inhalation of ^{81}Kr and nebulization of ^{99m}Tc minimicrospheres, 67.

Pregnancy
— Monitoring by RIA, 86.

Preparation
— Monoiodoinsulin specifically substituted on A_{19} tyrosine: —, characterization and determination of the specific activity, 152.

Pseudomonas Aeruginosa
— distribution of ^{51}Cr labelled lymph node cells in — infected mice, 37.

Q

Quality control
— of a biomedical journal, 125.

R

Radioimmunoassay (RIA)
— evaluation of — methods in monitoring pregnancy, 86.
— of carcinoembryonic antigen, 73.

— of free urinary cortisol, 61.
— of human luteinizing hormone, 18.
— of plasma and urinary estriol in pregnancy, 70.
— of serum thyroglobulin in various thyroid diseases with particular attention to carcinoma, 77.

Radioiodine
— in the treatment of thyroid malignancies, 55.
— in the treatment of thyrotoxicosis, 53.

Red cell
— ^{51}Cr — survival in normals and patients affected by hemolytic disorders, calculation of hepatic bilirubin clearance, 83.

Renogram
— computer processing of ^{131}I Hippuran —, evaluation of the impulsive response of the kidneys, 83.

RIHSA
— miocardial kinetics of ^{201}Tl, comparison with ^{125}I-, THO and ^{42}K, 59.
— Radioisotope cisternography by — in the diagnostics of intracranial pathology in infancy, 64.

rT_3
— T_4, and TSH RIAs as screening for congenital hypothyroidism, 49.

S

Scanning (see also Scintigraphy)
— ^{57}Co-bleomycin brain — in the diagnosis of intracranial lesions, 137.
— hepatobiliary — with ^{99m}Tc-HIDA, 62.
— perfusion lung — in the preoperative assessment of bronchial carcinoma, 78.
— of « cold » nodules with ^{131}Cs, 72.

Scintigraphy (see also Scanning)
— a — manipulation oriented language, 146.
— adrenal gland — with ^{131}I-19- iodocholesterol in medullary tumors, 85, 159.
— computerized brain angio — in cerebrovascular diseases, 68.
— in the diagnosis of nodular diseases of the thyroid: comparison with echography and thermography, 65.
— miocardial — with ^{99m}Tc pyrophosphate in acute miocardial infarction, 85.
— myocardial — with ^{201}Tl in angina pectoris, 81.
— of « cold » thyroid nodules with ^{137}Hg-bichloride, 84.
— perfusion — versus pulmonary arteriography in pulmonary embolism, 75.
— receiver operating characteristic curves in the detection by — of functioning metastases of thyroid cancer, 64.
— sequential renal — in the study of hypertensive patients, 76.
— sequential — in the diagnosis of malformations of the kidney and urinary tract malformations in infancy and childhood, 76.
— sequential — of the hepatobiliary system with ^{99m}Tc-orthophenolacetal-glutamic acid, 62.
— ventilation pulmonary — : comparison between continuous inhalation of ^{41}Kr and nebulization of ^{99m}Tc minimicrospheres, 67.
— with ^{99m}Tc pyrophosphate and dyphosphate in the diagnosis of acute miocardial infarction, 62.

Skull anomalies
— isotopic cisternography in congenital and acquired —, 57, 141.

Sodium balance
— relationship of plasma and urinary aldosterone with —, plasma renin activity and age in normal subjects, 7.

Suppression test
— using l-triiodothyronine (Werner's test) in the differential diagnosis of thyroid diseases, 81.

Scintigraphic images
— automatic analysis of —, 86.

Specific activity
— monoiodoinsulin specifically substituted on A_{19} tyrosine. Preparation, characterization and determination of the —, 152.

Systolic time interval
— continuous recording of fetal —, 48.

T

T_3
— free-index obtained from measurements of — resin uptake and total serum concentration, 43.
— index: normal values and correlation with thyroxine, 67.
— suppression test with — (Werner's test) in the differential diagnosis of thyroid diseases, 81.
— turnover of — in euthyroid, hypothyroid and hyperthyroid patients, 60.

^{99m}Tc
— HIDA: for hepatobiliary scanning, 62.
— HIDA: investigation on the hepatobiliary system, 82.
— minimicrospheres: comparison of nebulization with — and continuous inhalation of ^{81}Kr in ventilation pulmonary scintigraphy, 67.
— orthophenolacetal-glutamic acid: in hepatobiliary scintigraphy, 62.

— pyrophosphate: accumulation in pleural effusion, 57.
— pyrophosphate: myocardial scintigraphy in acute myocardial infarction, 85.
— pyrophosphate and dyphosphate: photoscintigraphy in acute miocardial infarction, 62.
— sulfur colloid: hepatic kinetics in cirrhosis, 107.

Thermography
— an introduction to medical —, 5.
— scintigraphy, echography and — in nodular diseases of the thyroid, 65.

THO
— Myocardial kinetics of ^{201}Tl, comparison to ^{125}I--RIHSA, — and ^{42}K, 59.

Thyroglobulin
— circulating: interference in the determination of antithyroglobulin autoantibodies, 85.
— measurements of serum — by RIA in thyroid diseases, 77.

Thyroid
— autonomous hyperfunctioning adenoma: spontaneous regression in 8 cases, 84.
— autonomous nodules: recovery of pituitary and thyroid functions following excision of — in euthyroid subjects, 63.
— cancer: early diagnosis with thin needle biopsy, 66.
— « cold » nodules: ^{131}Cs scan, 72.
— « cold » nodules: cytologic pictures, 73.
— « cold » nodules: evaluation with ^{201}Tl scintigraphy, 77.
— « cold » nodules: use of ^{197}Hg-bichloride in the scintigraphic study, 84.
— diseases: suppression test with l-triiodothyronine in the differential diagnosis of —, 81.
— function: recovery following surgical excision of autonomous nodules in euthyroid subjects, 63.
— functioning nodules: criteria in the selection of treatment, 58.
— hyperfunctioning nodules: treatment with ^{131}I, 58.
— malignancies: treatment with radioiodine, 55.
— microsomal antibodies: parallel measurement by passive hemoagglutination and competitive binding assay, 75.
— neoplasms: a diagnostic strategy with radioisotopes, ultrasounds and cytology, 77.
— nodular disease: scintigraphy, echography and thermography in the diagnosis, 65.
— nodules: thin needly biopsy in the early diagnosis of cancer, 66.
— papillary cancer: biological behaviour and therapeutic planning, 82.
— performance: in an iodine rich environment, 30.
— stimulating immunoglobulins: radioreceptor assay of TSH, its use to detect —, 68.

Thyrotoxicosis
— treatment with radioiodine, 53.
— rapid control with combined ^{131}I, antithyroid and KI therapy, 23.

Thyroxine
— normal values and correlation with T_3 index, 67.
—, rT_3 and TSH RIAs as screening for congenital hypothyroidism, 69.
— single step free — index: comparison of borderline results with two methods, 71.

^{201}Tl
— in the scintigraphic evaluation of « cold » thyroid areas, 77.
— myocardial and blood kinetics of — and ^{42}K, 59.
— myocardial scintigraphy in angina pectoris, 81.

Tomography
— by 90° Compton scattering, 72.

Tomoscintigraphy
— preliminary clinical evaluation, 69.

TSH
— T_4, rT_3 and RIAS as screening for congenital hypothyroidism, 69.
— radioreceptor assay of —: its use to detect thyroid stimulating immunoglobulins, 68.

Tumor localizing agents
— use of ^{137}Hg bichloride in the scintigraphy of « cold » thyroid nodules, comparison with other —, 84.
— value of ^{111}In-bleomycin as a —, 79.

Turnover
— of T_3 in euthyroid, hypothyroid and hyperthyroid patients, 60.

U

Ultrasounds
— a diagnostic strategy for thyroid neoplasms: radioisotopes, — and cytology, 77.
— transcutaneous Doppler — in the detection of cerebral blood flow changes, comparison with angiography, 98.
— whistling in the light, 2.

W

Werner's Test
— in the differential diagnosis of thyroid diseases, 81.
